

What is Blue Flag programme?

AD Marina Bar has been awarded a Blue Flag in June 2017. The Blue Flag is an environmental award given to marinas making a special effort to implement sound management with respect to the local environment and nature, and providing users with information on environmental issues. To attain the Blue Flag, the marina has to comply with a number of criteria concerning environmental information and education, environmental management, safety and service facilities, and water quality.

The Blue Flag is awarded by the Foundation for Environmental Education (FEE), a non-governmental environmental organisation and is represented by national organisations in each of the participating countries around the world.

-) The Blue Flag is an environmental award for beaches and marinas
-) The Blue Flag is concerned with four main areas:
 - 1) Environmental education and information
 - 2) Environmental management
